SUMMARY

Full-Stack Engineer with 6+ years of commercial experience building scalable SaaS and subscription-based platforms.

Designed and developed a production education platform from scratch (frontend architecture, backend services, deployment setup), supporting subscription users and AI-powered features.

Strong focus on performance optimization (up to 50% speed improvements), system scalability, and clean architecture.

Experience leading frontend teams (3+ engineers), conducting code reviews, and owning feature delivery end-to-end.

Seeking product-focused engineering roles in high-impact teams.

CORE COMPETENCIES

- **Frontend Engineering:** React, Next.js, TypeScript, Redux, SSR, SPA architecture, SEO optimization

- **Backend Engineering:** Node.js, Strapi, Express, REST APIs, Knex, Auth flows, Payment integrations

- **Infrastructure:** Railway deployment, Staging/Production environments, Redis, Git-based CI/CD

- **Engineering Practices:** Architecture design, Code reviews, Feature ownership, Performance tuning, Agile workflows

EXPERIENCE

Full-Stack Engineer

Generative AI | (Education SaaS Platform) | May 2024 – Present

Education & AI-driven subscription platform with 1000+ enrollments on recent course release.

Ownership & Impact:

- Designed and implemented full platform architecture from scratch (frontend + backend structure)
- Built subscription-based learning system with enrollment flows and gated content access
- Developed custom Strapi controllers & services for business logic
- Implemented database optimizations via Knex (batch loading, query refactoring)
- Improved page performance by ~50% via backend and frontend optimizations
- Integrated authentication, payment flows, automated emails, and Slack notifications
- Set up production and staging deployments
- Established code review practices improving maintainability and reducing regressions, onboarded additional developers
- Currently focused on backend scalability and service layer improvements

Stack: React, Next.js, TypeScript, Node.js, Strapi, Knex, Redis

Front-End / Team Lead

Nix Solutions | *Dec 2020 – Apr 2024*

Worked on multiple commercial React-based projects.

Leadership Experience:

- Led frontend team of 3 engineers
- Distributed tasks, conducted regular code reviews
- Defined frontend architecture and implementation strategies
- Participated in global project estimation

Engineering Highlights:

- Built scalable React + TypeScript applications
- Implemented SEO optimization in SPA environments
- Optimized bundle size and improved performance via lazy loading
- Delivered React frontend integrated with WordPress backend
- Maintained production systems under changing business priorities

Earlier Career (Frontend Development)

2020 – 2021

Worked with Vue ecosystem building dashboards, admin panels, and cross-platform applications.

Modernized legacy systems and implemented reusable UI components.

EDUCATION

- **Master's in Computer Engineering** (2022 – 2025)
- **Bachelor's in Computer Engineering** (2018 – 2022)

LANGUAGES

- **English:** Upper-Intermediate
- **Ukrainian:** Native
